View south to existing hedgerow

View to copse to be retained

View toward Church

River Lark

Landscape

This plan illustrates a response to the landscape context and characteristics of the site and identifies an approach to integrating landscape and ecological features within a framework and your feedback will inform the evolution of the Masterplan. The landscape framework has been designed with a focus on a living landscape that benefits all. As such, habitats of importance (specifically trees, hedge rows and woodlands) will be retained, protected and enhanced within the scheme to provide improved habitat to protected species in the long term.

A network of interconnected green spaces is proposed around the retained vegetation and Rights of Way. This would link together the existing features of the site and provide a landscape framework for the development, and a new edge and gateway into Mildenhall.
